

5 March 2024 | OOPP Meeting

Participants: Verkoren F., Lam D., Furlan Piva Demarzo L., Anica-Popa V., Clatici V., Olaru C.

Estimated time: 51-56 minutes (Actual length: 45 minutes)

While getting setup:

Talking about weekly individual knockout criteria that failed mostly already fixed or easily fixed (1min)

During actual meeting:

- **Opening by chair (1 min)**

Basic opening

- **Check -in: How is everyone doing? (1 min)**

All alright

- **Announcements by the team (5 min)**

Vlad has an announcement about backlog:

Question abt addevent, what does automatically adding participants mean?

Ans: when someone gets invited (by owner) and they join it by id/link they are automatically added

Question: multiple expenses different currency but user has preferred currency, in what currency does the user see the expenses? We can decide ourself, decided to show both Mattermost is not necessary to talk in

- **Approval of the agenda - Does anyone have any additions? (1 min)**

Everyone approved the agenda

- **Approval of last minutes - Did everyone read the minutes from the previous meeting? (1 min)**

Everyone has read the minutes and approved

- **Announcements by the TA (15 min)**

-Luca failed week 2 but it's solved

-Duco failed with approving merges so he has to approve an extra one

-Make sure your email is the same in GitLab, make sure your email is correct how you did it in git assignment.

Lucca and Calin have two emails in analytics

Victor had two options when committing, he has to use the correct one.

Just make sure your email is correct in analytics in GitLab

-Week 5 knockout criteria doesn't really hold but you still HAVE to do some stuff!

-Each meeting needs a visual way to show improvement

-presentation oopp probably on Thu or Fri, can also be Tue, if there's some problem with that you can't go on a day send a message to Mike.

-Buddycheck will be opened this week MAKE SURE TO FILL IT IN THIS WEEK! Is easy Feedback is anonymous on Buddycheck

-Mike will give formative feedback about planning, tips: use labels and issues can use /estimate, In the description you can command /estimate and /spent, you can have planning

docs in docs. We can add more to issue boards and can use milestones. We already work with most of these features so that's good.

-He will check how we do code reviews and technology in week 5.

-Addition Mike: Today they will manually check the knockout criteria from w3

-Vlad question: what do we use epics for? Are they like features? Mike never used it but there is docs about, weights is often used for time spent. Time tracking same as /estimate and /spent

-Calin: can milestones be extended? Mostly milestones are weekly but it's possible but advised against.

- **Presentation of the current app to TA (5 min)**

-Current app is basic UI for add participants, open debts, addexpense, and event page and home page and settings.

- **Talking Points: (Inform/ brainstorm/ decision making/ discuss)**

- **Discussion regarding UI (5 min)**

UI positions should be good (Home button is a little off on all pages) and relative to size of screen,

Main won't link to addexpense and add participant

Server will have all events, not just the ones you are part of

We should have a first time login screen where they put in information and that will be stored locally.

Add statistics, createEvent, invitecode(just a popup)

Add more functionality

Add endpoints first

Language needs to be shown on mainpage with a flag icon next to it

Event overview

We should have a list of all events on the homepage

- **Discussion regarding the Database (10 - 15 min)**

We should start working on endpoints

We should add the event to expense dependency

- **Discussion of end-points (5 min)**

Start working on endpoints this week

- **Division of work (2 min)**

Everyone will start working on controllers of the classes that they worked on in the beginning.

- **Feedback round: What went well and what can be improved next time? (1 min)**

It was good

- **Planned meeting duration != actual duration? Where/why did you mis - estimate? (1 min)**

Underestimated the time TA announcements would take up and therefore had to continue the meeting for a few minutes outside

- **Question round: Does anyone have anything to add before the meeting closes? (1 min)**

No questions

- **Closure (1 min)**

Just a normal closure.
